

# China International Textile Printing Industrial Technology Exhibition 2017

The CITPE (China International Textile Printing Industrial Technology Expo) will be held during 24 - 26 May 2017 at Hall 1 and 2, Poly World Trade Center, Pazhou, Guangzhou, China.

The show focuses on the textile printing equipment and materials for digital printing and communication platform. CITPE has been successfully held for 11 times since 2006 in Shanghai, Suzhou, Dongguan and Guangzhou. It has enjoyed a good reputation and is considered as a brand model in the industry.

CITPE has become an important platform for domestic and international printing enterprises in China to explore the market. The 2016 edition of CITPE achieved tremendous success with over 10,000 professional visitors.

CITPE2017 focuses on the challenges faced by the textile printing industry and will be attended by industry experts and guests from around the world. The show is expected to bring a variety of hot topics into the spotlight. With various activities including industry and technology Forums, networking events and product displays.

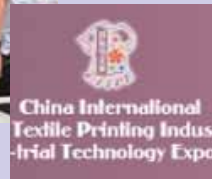

The CITPE 2017 will present a visual and auditory experience for buyers and visitors.

Located in the Southern China textile industrial circle, Guangzhou is one of the benchmark city in China's economic center of The Pearl River Delta, as well as an important area of Chinese textile printing industry cluster.

Guangzhou has become the most important market for China textile printing industry, with a convenient location and transport links. With the Canton Fair, the Asian Games and other international events successfully being held, Guangzhou has become one of the well-known

international exhibition cities. The exhibition will promote closer exchange and cooperation among the textile printing industry, help manufacturers to explore the textile printing market, understand the status of the industry and create opportunities.

This 12<sup>th</sup> edition of CITPE, China International Textile Printing Industrial Technology Expo/ China International Textile Digital Printing Technology Expo will continue to foster

more professional visitors, larger exhibition scale, and better exhibition layout. The show organizers aim to leverage their excellent expertise and years of professional experience of holding international textile exhibitions to deliver the best platform for exhibitors to display, communicate and exchange ideas at Poly World Trade Center.

## Printing machinery

The digital jet-printing system, automatic/semi-automatic/manual textile printing machine, rotary screen-printing machine, flat screen printing machine, rotary screen printing machine, machine finishing equipments like oven, steamer, drying machine, drawing machine, printing plate line, mixing equipment, dyeing, and finishing equipment.

## Printing Materials

The printing pigment, coating mixture, printing paste, water slurry, printing auxiliary agents e.g. heat set ink, ink, paste, thickening agent, transfer paper, flocking paper, gold foil paper, glitter powder, etc.

## Others

The plate processing unit, silk net, sensitive emulsion, heat transfer and water transfer printing equipment, material and machinery; different kinds of patent technology and software relating to textile printing; professional newspapers and periodicals and other media. ♦
