

# Tomsic Evenness Tester EASY

## The Simplest Tester on the Market!

Tomsic Srl, established in 1956, a family-owned company from Italy is run by its the second generation of owners. Tomsic is one of the leading companies active in production and marketing of complete laboratory equipment for spinning mills as well as autoleveller systems for cards and drawframes.

This article contributed by Tomsic focuses on the Tomsic Evenness Tester, EASY: the evenness tester for yarn, roving and sliver. "EASY" is already well known to major world markets.

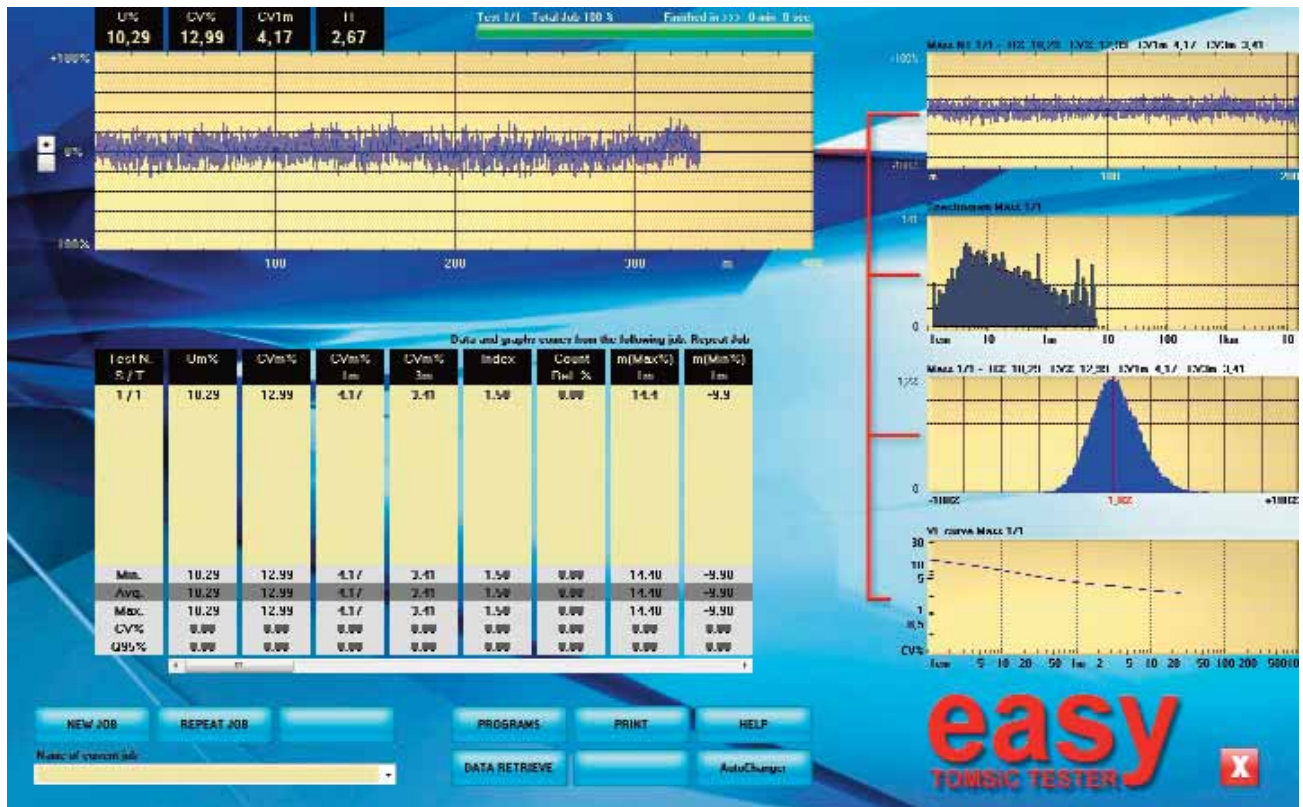

The great success of the Tomsic tester is due to the application of the most advanced technology, the simplicity of

operation, flexibility, zero maintenance cost and an attractive price to performance ratio.

The Tomsic Evenness Tester software is the most operator-friendly software with easy functions (test run with just 3 clicks). The graphical and numerical results, perfectly aligned to world standards, are displayed in

only one window for direct test comparison.

Furthermore, the flexible software, installed on a normal PC with Windows10, allows automatic update of the latest features directly from the Tomsic head office service station free of cost.

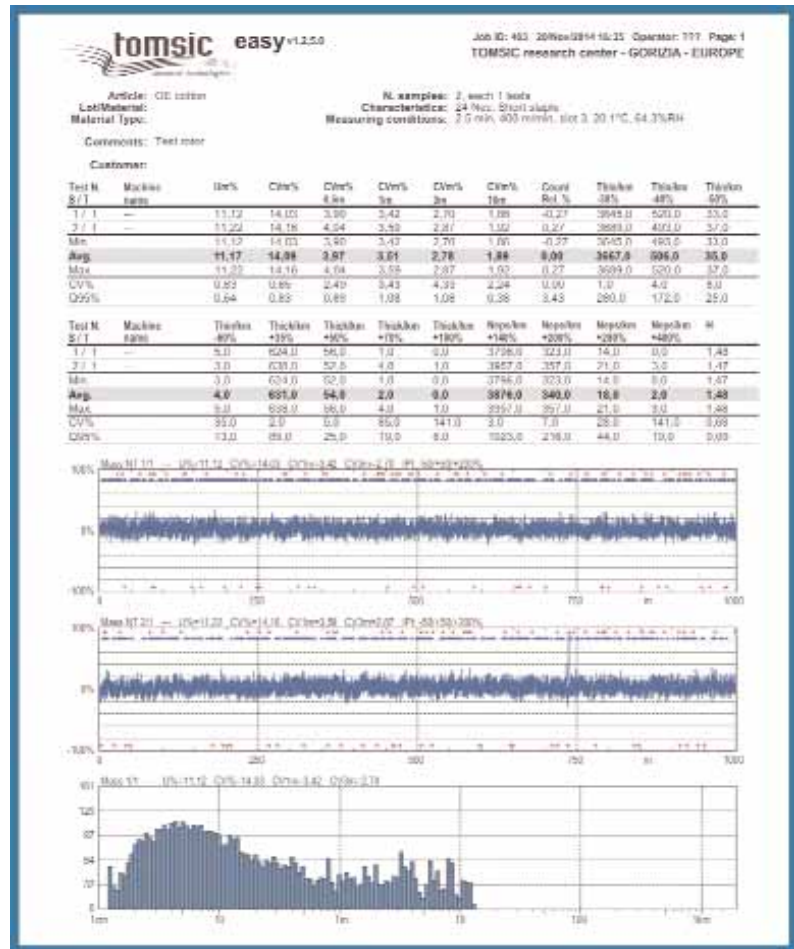

This advantage guarantees that the customer's equipment is always fully updated with the most cutting edge technology.

"EASY" data retrieval is based on the Open SQL Server database. This database using the SQL principle enables all data to be exported easily to other computers/databases. All parameters are with OPEN access which permits FREE LAN connection. The reports can be globally read ON-LINE and in REAL TIME. "EASY" software also allows simple export of the data in EXCEL and other programs.

"EASY" was developed based on the MODULAR principle. Each slot is independent and easily extractable by the customer himself and with an auto test of each module. In practice, a lower service cost is guaranteed and thus a Tomsic technician on the site is not required.

Since 2016, Tomsic has been offering local sales and service assistance to all Pakistani customers, so it can guarantee prompt and competent assistance. Tomsic is represented in Pakistan by Tahir & Sons.

For further information please check out the website [www.tomsic.eu](http://www.tomsic.eu) and find out more details about the "EASY" Evenness Tester and the complete range of Tomsic products. ♦
