

SUNWIN[®] highlighted drying solutions for the textile industry

According to Mr. Andy Chow, Director, SUNWIN[®], "At Textile Asia 2017 our focus is on XTD Continuous Towel Tumble Dryer. It has a specially designed blower and inverter speed control with the high efficient heat exchanger to ensure even and strong air flow to perform perfect tumbling. High production capacity up to 7-8 tons per day can be achieved from one 2.4 meters working width machine. For 3.2 meters working width dryer, it can achieve 10-12 tons per day production. The power consumption

is also reduced due to a good combination of the blower and inverter."

He added, "It has a reliable user-friendly touch screen controller with PLC to control the speed and temperature. The tumbling tube connected with the blower is made from stainless steel SUS304 which ensures long lifetime use. The XTD allows the towel to have perfect hand feel with good softness, perfect bulkiness due to raised piles with greatly improved water absorbency."

Our honorable customers are: Fazal Sardar, Size Textile, Tulip Towel, A-one Towel and Al Hamra Knitwear Industries. ♦

TEXPRO[®] Stentex K330.8 stenter frame range

According to Mr. Ulrich Althoff, Sales Consultant, TEXPRO[®], "With experience from the successful Research and Development for 3300 stenter with STENTEX Germany. TEXPRO[®] and STENTEX Machinery brought out to the market STENTEX K 330.8 - horizontal guide

chains. STENTEX K 330.8 is equipped with PLC touch screen control panel and patented nozzle, which meets process requirements of both woven / knitted fabrics and is environment and user-friendly." ♦

Zhejiang Kefeng Silicone Co. Ltd. chemistry for textile industry

According to Mr. Waseem Bari Fareedi of Bari Marketing & Promotions their representative in Pakistan, "We are highlighting a series of high-quality products by Zhejiang Kefeng Silicone Co. Ltd. at Textile Asia 2017."

Mr. Waseem Bari Fareedi.

He added, "Nowadays Chinese chemical companies are offering replacement products such as dyes, pigments, inks and finishing chemicals at very low cost which helps to lower the production cost."

"The new Linesoft SRS-30 by Zhejiang Kefeng Silicone Co. Ltd. is a block copolymer based on (AB)_n technol-

ogy. The product is an upgrade of common amino silicone oil, and overcomes its drawbacks of poor stability and non-ryeing."

According to Mr. Vincent, Manager of Zhejiang Kefeng Silicone Co. Ltd. "Our new product HYDROSOFT C-60-W is a ternary block functional sili-

cane copolymer, which combines several chemical entities in one linear molecule (siloxane, Polyamine and polyether copolymer). HYDROSOFT C-60W is a new textile auxiliary agent

designed to deliver a hydrophilic, soft, silky hand feel to all types of fabrics at the lower dosage."

He added, "Our Linesoft WSC-40 is a new ternary block silicone for cotton, which is a three-component block copolymer of polysiloxane, polyamines and polyether." ♦
