Atexco VEGA 3180DL high speed industrial digital textile printer

Represented in Pakistan by Farooq Sitara International.

Atexco was established in 1992 as a key company in the Software Park in the Hangzhou Hi-tech Zone and is a serial winner of the prestigious National Torch Prize. The company also undertakes projects in the Hi-tech Research and Development Program (part of the government's 863 plan) and the state's High-tech Industrial Feasibility Project.

Atexco is an international leader in garment CAD/CAM/CIM systems, digital printing systems, inkjet direct manufacturing systems, advertising printing systems and carpet printing.

In China, Atexco is the biggest supplier of inks, software and printers for digital printing sector. Atexco holds almost 80% of the market share in China.

According to Mr. Farooq Sitara, CEO of Farooq Sitara International, "We are one of the pioneers in the digital printing sector and introduced digital printing technology in Pakistan. The sales and marketing of Atexco digital printing machines started in 2008 and we have sold many high speed and wide width digital printing machines in Pakistan."

Talking about the sales in Pakistan, he concluded, "Olympia Textile, a pioneer of digital printing in Pakistan has installed three Atexco machines. During last five years, several machines by Atexco have been installed in Pakistan."

Atexco VEGA 3180DL
