

UGOLINI and Umar Fasih Trading display GS series 1000 KG

Ugolini Srl was founded in 1970 by Umberto Ugolini. Today, Ugolini products can be divided into four categories: dyeing machines, laboratory apparatus, stainless steel accessories for dyeing processes, machines for drying, for hydro-extraction (centrifugal machines) and for dyeing automation.

At Textile Asia 2017 Lahore, Ugolini Srl along with Umar Fasih Trading Company displayed GS Series machine for 1000 kg capacity.

The machine is designed for dyeing operations under HT/HP, up to 140°C and

up to 6 bar for bulk production. The customer can dye yarn in packages, tops, ribbons, zippers, fabric in beams and loose fibres. The company offers different models suitable to dye from 50 gms to 1 ton in single kier to multi kier. Each kier is equipped with complete carriers for bobbins or tops or baskets for fibres or beams for fabric or zippers or ribbons, with suitable spindles or beams, rapid locks and plates. This machine works in the air-pad system or fully flooded the system with static pump and expansion tank. The two systems working together are also available. The various parts of the machine in

contact with the dye liquor are in stainless steel AISI 316 L and the entire machine is built in compliance with CE standards of quality and safety, certified by an independent agency. ♦

Son-tech® UFHT Towel dyeing machine by Umar Fasih Trading

Son-tech was founded in 1997 and is located in Huabao South Road, Foshan National High Technology Development District, Foshan, Guangdong, China.

United Towel, Karachi has recently installed two sets of UFHT Towel dyeing machines of 1600 Kgs.

M. Yahya M. Yousuf Bari Mills have also installed two sets of 1200 Kgs and 1600 Kgs UFHT machines respectively. Fatima Weaving has installed six towel dyeing machines.

Mr. John Wu, Sales Director, Son-tech Precision Machinery Co., Ltd. present at Textile Asia Exhibition in Lahore said that Pakistani home textile market is very

important for us. Our R&D department is constantly working on new products suitable for Pakistani market.

Our UFHT is new towel dyeing machine which combines years of successful research and development. The liquor ratio can reach 1:4.5 when fully loaded, which helps further reduce energy consumption and process time and also ensures perfect dyeing quality. The innovative design of the fabric chamber makes 400-kg capacity per chamber possible with best production results. ♦

Tti consumer testing services textiles and restricted substances

Tti testing laboratories have been providing testing services to the industry since 1995. Tti testing laboratories are ISO 17025 accredited labs with the largest scope of accreditation in Pakistan. They deliver services by well-trained technicians with complete accuracy at market competitive prices. They have the most modern testing facility in Pakistan and state-of-the-art equipment from leading international brands. ♦
