# Sargodha Cloth Processing Mills acquires first MS LaRio in Pakistan

**Sargodha Cloth Processing Mills acquires first MS LaRio in Pakistan. Khalid Aleem from Business Systems International (BSI) who represents MS Printing in Pakistan announced the recent sale at DPS 2017 exhibition.**

According to Mr. Khalid Aleem, Director Business Systems International (BSI), this is indeed a milestone for Pakistan's textile printing industry. The teams of BSI and MS Italy were able to meet many existing and future customers at DPS World Exhibition, which was held at Lahore Expo Centre from 20th to 22nd Oct 2017.

Sargodha Cloth Processing Mills Ltd based in Faisalabad is first LaRio customer in Pakistan. This state of the art single pass machine is provided with 210 heads for an

initial production of 40,000 to 60,000 meters per day. The machine has already been shipped and is in the process of erection and commissioning with the production expected to start end of November 2017.

He said, "MS is an Italian company which provides printing technology for the textile industry. MS participation at this exhibition shows the future market potential of digital printing and we already have references in Pakistan."

"MS LaRio provides greatly reduced production downtime, any size of printing repeat, an infinite range of colours and last, but not the least, a very low environmental impact. I would say that our payback period is roughly two or maximum three years," concluded Mr Khalid Aleem.

*Mr. Muhammad Amjad Javed, Director, Al-Hamra Fabrics Pvt. Ltd. with Mr. Khalid Aleem of BSI.*

The LaRio is like two machines in one. The quality is the same no matter what speed you print. The LaRio has a maximum of 75 meters (246 feet). And with the LaRio the heads are stable, the alignment is fixed; with other types of printing, it can be hard to print on the same spot. ♦

## Union Group Industries

**Union Group Industries has been striving to offer the state of the art printing solutions for leading textile apparel brands.**

According to Mr Ghulam Abbas, CEO, Union Group Industries, "Union Group launched first-ever digital textile ink for EPSON and Kyocera print heads in association with renowned EPTA inks from Italy."

He added, "We have finally started to bridge the screen and digital printing applications with newest Hybrid MHM 1Q digital screen printing machine from Austria."

At DPS World 2017, Union Group Industries launched EPTA digital inks for the first time in Pakistan. ♦
