

4th Intex South Asia Exhibition welcomes textile industry under one roof

Intex South Asia 2018 taking place from 14th to 16th November 2018 in Colombo, Sri Lanka is an international sourcing trade fair, showcasing the best in yarns, fabrics (apparel & denim), clothing accessories and allied services from across Asia and the World. It offers suppliers the access to the leading textile and apparel markets of South Asia - India, Bangladesh, Sri Lanka and Pakistan.

Intex South Asia gives access into South Asia, which is not only the second largest garment manufacturing and exporting region in the world

but also has a massive domestic market spurred by South Asia's 487 million fashion conscious youth with increasing

disposable income and spending power. It is a robust platform for untapped South Asian intra-regional trade.

As South Asia is the second largest market after China, it is one of the world's premier garment export hubs, accounting for 12% of global exports and manufacturing 80% of the world's leading brands. Intex South Asia facilitates access to industry developments, networking opportunities and strategic initiatives with other global suppliers from across South Asia and the world to help expand industry and business, in one location, under one roof. ♦

GERLACH is one of the world's most important manufacturers of chains, clips and pin links for stenters, with a sales network covering the largest market share. Our strength is more than forty years of experience. That's why we use only premium materials and attribute particular importance to high precision and to a constant quality standards. Thanks to GERLACH philosophy, we have acquired the leading stenter manufacturers worldwide, which we supply with more than 120,000 clips and more than 120,000 chain links a year as well as lube-free chains with long life lubrication provided of special synthetic bushes, lasting from 10,000 to 40,000 hours of operation. We can also produce chains operating at 300°C, as well as corrosion resistant chains. All clips are thermally stabilized before delivery. Our plastic film technology division can supply clips for the production of BOPP and BIAx films.
