

## Jingwei/Qingdao JWF1213 Carding Machine

**Qingdao Hongda Textile Machinery Co., Ltd is the subsidiary company of Jingwei Textile Machinery Co., Ltd. It is a large-scale backbone enterprise of textile machinery manufacture, as well as an important manufacture base for blowing-carding machinery and auto-winder. The company adheres to the development of “product innovation, technological innovation, mechanical innovation, brand innovation.”**

The JWF1213 card is the latest generation of high production card, based on the idea of high production,

high efficiency and high quality. With the extensive application of hi-tech material and adjustment of card core-carding area, the production of JWF1213 can reach 160 kg/hour and the sliver delivery speed can reach 300m/min. As the working width is increased up to 1.28m, the quantity of required cards is reduced, so the investment cost, such as area occupation, labour, energy consumption will be greatly saved. Based on the high production, high quality, reliability and stability, the JWF1213 card has become the top choice for users and more than 2000 sets have been sold. More and

more Pakistan customers are choosing a JWF1213 card.

According to Mr Chen, President of CTMTC, the benefits of the machine include reduced labour, reduced energy consumption and guaranteed product quality. The machine on display at IGATEX 2018 has been sold to Saritow Spinning Mills, which manufactures and sells yarn in Pakistan. The company part of Saigol was founded in 1987 and is based in Lahore, Pakistan.

**Jingwei can be visited at ITMA ASIA + CITME 2018 in Hall H2, Stand D01.◆**
