

Dechang Compact Spinning Technology

Ningbo Dechang, a high-tech enterprise, specializes in research, manufacturing, marketing and service of compact spinning device, and thus wins the National Award for Technological Invention and First Award for Science & Technology Progress of Zhengjiang Province in 2007. Their products are largely exported to many countries such as Pakistan, India, Turkey and Vietnam.

Dechang has recently launched the latest compact spinning technology suitable for 100% cotton, 100% viscose, PV, PC and various types of blends. It consists of the longest drafting zone which compact within 51 mm fiber length.

It is more economical, the rubber cots and middle gears operation cost are reduced by 50%. The drafting ratio is changeable for cotton 1.056, viscose 1.01 and blends changeable on different mix rate.

Dechang will be present at ITMA ASIA + CITME 2018 in Hall H2, Stand F32.◆

Shanghai Seow Yi Industrial Co.Ltd.

Shanghai Seow Yi Industrial Co., Ltd. is a manufacturer of card clothing and other textile related machinery and parts with well-equipped testing facilities and strong technical support. With a wide range, good quality, reasonable prices and designs, their accessories are recognised in textile and other industries.

According to Ms. Nancy Zuo of Shanghai Seow Yi Co. Ltd., "Our Company attaches great importance to our participation at different fairs as many corporate leaders attend these exhibitions. We meet our old customers and have detailed communication with our established customers. It is important to note that Seow Yi Machines improves the productivity and efficiency of our customers.
