

Thies: Passion for Innovation

Thies GmbH & CO. KG concentrates on sustainable product solutions and focuses on the development of innovative, intelligent and integrated concepts for yarn and fabric dyeing. Thies will be present at ITMA ASIA at Hall H6 Stand E 18.

This time Thies Textilmaschinen will present the established and successful iCone yarn dyeing machine. This machine consolidates highest ecological standards with technological intelligence to achieve tremendous savings in water and electrical consumption. The 2018 version incorporates various new detail improvements, many of them developed in response to suggestions from customers and users.

iCone yarn dyeing machine.

The construction of the iCone is based upon the worldwide established eco-bloc series of Thies, but involves innovative new technologies. Its newly designed 'pump bloc' system allows dyeing with an ultra-short liquor ration. Depending on the carry-over of the material, liquor rations of 1:3.6 in partially flooded vessels are performable in practice. Improved rinsing functions allow the reduction of the after-treatment times. Moreover, the new flow

converter design enables the adjustment of the flow reversal, namely from inside to outside and from outside to inside.

iCone has been specifically developed to meet the requirements of stringent international and local environmental protection regulations with simultaneous consideration of its economic efficiency. ♦

Qingdao Hongda Cards at leading spinning mills in Pakistan

Qingdao Hongda Textile Machinery Co., Ltd is the subsidiary company of Jingwei Textile Machinery CO., Ltd.

It is a large-scale textile machinery manufacturer, with an important manufacturing base for cotton carding machinery and auto-winding machines. The company adheres to the development of "production innovation, technological innovation, mechanism innovation, brand innovation.

In recent years, the company has been granted with dozens of international patents. The Technology Center is certified as the National Technology

centre. Its Blowing-carding machinery wins the First-class Scientific and Technological Progress Award issued by the China Textile Industry Association and is the promotion program in the Ninth Five-Year Plan of the State Science and Technology Commission.

According to Mr. Tahir & Sons, "Our team along with Qingdao Hongda Textile Machinery Co.,Ltd has achieved a milestone by selling high speed cards to pioneer and reputed customers in Pakistan as an agent of CTMTC to Fazal Cloth, Reliance, Al Nasr Textile Ltd, Saritow Spinning Mills Ltd,

Kohinoor Textile, Abdullah Fibers(Pvt) Ltd, Bhimra Textile Pvt Ltd and Babri Cotton Mills Ltd. Customer's feedback is positive and according to them the Card is producing excellent results and competing with European brands." ♦
