

Xetma Vollenweider: New Lace Clipping System

Following the successful introduction of the first warp float cutting machine for jacquard woven fabrics, Xetma Vollenweider release the new lace clipping machine X-CITE XF.

With the next generation of the X-CITE XF technology, Xetma Vollenweider is providing a new model range for clipping warp knit lace and cutting floating warp threads of jacquard fabrics.

The key advantage of the X-CITE XF as compared with conventional clipping machines is the option to realize a reliable clipping not only of straight warp floats but of diagonal oriented floating threads, too.

The innovative technology portfolio of Xetma Vollenweider includes the following product lines: Soft Touch - Brushing & Emerizing, Plush Touch - Raising, Even Touch - Shearing, Level Touch - Carpet Shearing & Finishing and Clean Touch - Fabric Cleaning.

The complete product range of Xetma Vollenweider is developed by experienced engineers and completely produced at the company domicile in Aue, Germany. This enables Xetma to provide individual solutions for textile companies, always customised for their specific needs.

Concerning a wide range of technologies in the field of textile finishing for apparel, home textiles and technical textiles, Xetma Vollenweider opens up a further market with the new X-CITE XF.

The potential customers for the Clipping machine X-CITE XF are manufactures of Raschel lace and "Calais lace", as well as commission finishers in this segment.

Xetma Vollenweider can be seen at Hall 5, Booth F16, showcasing innovative technological possibilities of their versatile finishing systems.◆

RASTGAR

AIR COMPRESSORS

Ultima™

U75 – U160 Variable Speed

Oil Free

PureAir
100 CLASS ZERO PLUS SILICONE FREE

Ultima™ – The real deal

The unique patented design delivers numerous benefits to compressed air users:

- 100% oil and silicone free
- Highest levels of air quality
- Highest efficiency levels
- Low running costs
- Low noise design
- Installation at point of use
- LP & HP airends individually driven
- Energy efficient across the flow range
- Very efficient heat recovery
- Most efficient machine
- Easy installation
- No dusting required
- On-board monitoring
- Very user-friendly
- Available with iCom remote monitoring
