HARA-PAN KURNIA from Indonesia buys the 6th BRÜCKNER stenter

Indonesia is one of the most important clothing and textile exporting countries worldwide. The Indonesian company HARA-PAN KURNIA buys the 6th BRÜCKNER stenter. This company has been a part of this industry for over 45 years. The company is not only oriented in producing and selling high-quality fabrics, but they also strive to produce them in a more environmentally friendly process.

HARAPAN KURNIA is certified for ISO9001, OekoTex and USA Cotton and focus on local social engagement. The company's goal is to be the leader in textile business by developing new and fashionable products with modern and eco-friendly technology as well as

supported by Indonesia's skilled human resources.

The company has in total of 300 employees, a turnover of 50 million EUR per year and their annual growth rate is 20%. HARAPAN KURNIA produces medium to high-end fashion wear, swim & sportswear as well as ladies & menswear for the local market and for export. Almost 95% of their products are knitwear and the rest is woven fabrics. The articles are made of cotton, cellulose and blended material with up to 35% spandex content.

HARAPAN KURNIA has five BRÜCKNER machines in two separate locations and is very satisfied with the good machine quality, the accurate

automatization, the accurate control system and the optimized heat recovery system. Another point in their favour is good after-sales support. They are convinced of the additional advantages of the BRÜCKNER stenters in comparison to machines with lower investment from other producers.

HARAPAN KURNIA indicates the better machine setting ensures better quality and the good support as decisive points for their decision to buy now their 6th BRÜCKNER machine. With BRÜCKNER as their partner, HARAPAN KURNIA aims for continuous product developments for the high-end export markets and wants to keep their position as one of the market leaders for high quality knitted fabric in Indonesia. ♦
