

Muratec VORTEX III 870: World's fastest spinning machine

The VORTEX III 870 spins 100% cotton, blends and synthetic fibers up to 2 inches in length, at speeds up to 500m/min, making it the world's fastest spinning machine. It provides 20 times the production of ring spinning. This machine is in a class of its own and features a Spinning Tension Stabilizing (STS) system, which is unique to the VORTEX III 870 and allows for more precise control of the yarn.

This high-performance machine delivers both speed and quality by performing all operations from a single source. It has eliminated the roving, spinning, and winding processes, making it an efficient, affordable option for all textile manufacturers. With easy operation, maintenance, and setting capabilities, the VORTEX III 870 is both versatile and user-friendly.

The Murata Machinery USA, Inc., is continuously develop and improve the machines to better accommodate applications, functions, and yarn. The

VORTEX III 870 is no exception and is guaranteed to come equipped with the latest technology, such as its Visual On-demand System (VOS), a data management system designed by Muratec.

In addition to optional add-ons, including the splice monitor, package lifter, and polymaster, the VORTEX III 870 can also be engineered to meet your unique needs.

Muratec is represented in Pakistan by Spintex Pvt. Ltd. ♦
