

# Demsan had successfully installed latest model of Precision Palletizing Machine at Rizwan Enterprises

According to Mr. Tuncay DEMIRCI, "We are delighted to announce the recent installation of one more precision palletizing machine with some new features to Rizwan Enterprises, Karachi. This machine can make single and double folding precision palletizing of woven fabric in one meter yard. The fabric palletizing height was two meter. It has adjustable speed control between 0 to 40 m/minute. With the new servo motor system more precise palletizing is possible."

According to Mr. Farooq Zakaria of Zakaria Trading International, "Demsan has sold many palletizing machines in Pakistan. Customers are very much satisfied with the performance, technology and after sales service from Demsan. We are regularly receiving inquiries for the latest palletizing machine. Beside of palletizing machines, we offer inspection and rolling, plaiting, double folding, twice double folding, batching, wet rope opening, fabric spreading and packing machines." ♦

Mr. Tuncay DEMIRCI, Overseas Sales and Marketing Manager, DEMSAN with Mr. Farooq Zakaria of Zakaria Trading International.

# SSM AG highlighted DIGICONE®2

Mr. Olivier Dessouslavy, Area Sales Manager, SSM AG.

SSM Schärer Schweiter Mettler AG presented their latest applications at IGATEX Pakistan 2019 in Hall 4.

Although markets, technologies and fashion are subject to continuous change, the endeavour of SSM is to deliver state-of-the-art products and best solutions for any new demand. Keeping this in mind, SSM is introducing several new applications:

SSM AG highlighted following technologies: TG30-ETC offering the combination of false-twist texturing and air-texturing in one process step.

Wide range of fancyflex™ options for creating slubs and neps with DP5-T.

PWX-MTC with online tension controlled, positively driven unrolling system precitens™ offering the highest flexibility and productivity.

Success of DIGICONE® 2 enabling higher dyeable package density with same package volume. ♦
