

Hebei Jigao Chemical Fiber Co., Ltd.

Hebei Jigao Chemical Fiber Co., Ltd. is a comprehensive enterprise integrating chemical fiber pulp, viscose fiber and thermoelectricity operated by Jilin Chemical Fiber Group Co., Ltd. The main products produced include fifteen varieties of nine major categories, such as chemical fiber long, short silk cotton pulp, wood pulp, bamboo pulp, hemp pulp, viscose fiber, bamboo fiber, hemp fiber, and intelligent thermostat fiber. Among them, bamboo pulp, bamboo fiber, hemp fiber, and intelligent temperature-regulating fiber are national invention patent products.

The "Tianzhu" fiber successfully developed by the company is a regenerated cellulose fiber which is made from bamboo which is widely grown and is made from patented technology. This fiber has good strength and excellent spinnability is an ecological and environmentally friendly textile raw material. The product won the national key new product and national technology innovation award.

"Tianzhu" fiber is called the fifth largest natural fiber after cotton, hemp, silk and wool with its natural antibacterial, anti-ultraviolet and moisture absorbing health and beauty applications. It has become a well-known new fiber brand

and sells well in domestic and foreign markets. Other patented products such as "San Ma" fiber and "Siweier" fiber is also being favored by more and more domestic and international consumers. ♦

PFAFF 2083: Powerful high-speed seamer with drop feed technology

The PFAFF 2083 seamer on display at Textile Asia offers an intelligent machine concept and the use of extremely wear-resistant components to guarantee the quality, flexibility and sewing speed of this high-speed seamer.

They have 50 years of experience with the production of "dry machines" and more than 15 years of experience with motors integrated in the sewing head which is reflected in these high-speed seamers. ♦

China Jianli Sticky Ribbon Co., Ltd.

Jianli Sticky Ribbon Co., Ltd was founded in 1993. It is one of the leading enterprise specializing in producing Hooks and Loops. The annual output of Hook & Loop is over 800 million pair meters and an industrial output value of over 3.5 billion Yuan.

The company has imported professional production equipment and advanced technology. Specifications: 10mm-170mm, multiple species, full specifications, high quality, and rich color samples. Hook & Loop is widely used in clothing, shoes, hats, bags, sofas, curtains, toys, tents, gloves, sports, medical equipment, all kinds of military products and other industries as accessories. ♦
